

## **ASK THE EXPERT: Your Guide to Proper BBQ Lighting**

### **Prior to lighting your BBQ:**

- Read your safety and care manual
- Check for leaks by Performing a Leak Test.
- Remove and inspect your burners for damage and blockages
- Check to ensure that a positive connection has been made between your gas hose and the gas source.
- Check to ensure your ignition button is functioning properly

### **Lighting the BBQ:**

1. Open the Lid
2. Ensure all burner control knobs are in the OFF position
3. *Slowly* turn ON the gas supply, ½-1 full turn
4. Wait approximately 5 seconds for the gas pressure to stabilize
5. Turn the centre/selected burner control knob to HIGH position
6. Press the Ignition button, Light with a match or BBQ lighter
7. BBQ does not light within 5 seconds- turn all control knobs to the OFF position.
8. Turn the gas source OFF.
9. Wait a few minutes. REPEAT Steps 1 to 6
10. Once Lit, preheat on HIGH for 5 to 10 minutes

### **Closing the Grill:**

1. Turn OFF all burner control knobs, including side burner and rotisserie burner ( if applicable)
2. Promptly turn OFF the gas supply.
